Commercially available firearms equipped with a “stabilizing brace” that are short-barreled rifles*

*May not be marketed by original manufacturer in displayed configuration, rather a wholesaler or retailer

This is not an exhaustive list of commercially available firearms equipped with a “stabilizing brace” that are short-barreled rifles. However, this list is representative of how ATF will apply the definition of “rifle” to firearms that are equipped with a “stabilizing brace.” For purposes of this document, the term “short-barreled rifle” is used to refer to rifles with a barrel or barrels of less than sixteen inches, that are subject to the provisions of the NFA.
